\_\_\_\_\_

Mettam Safety Supply will contact you for approval/decline of repair cost before action is performed on unit(s). Typically, specific units repaired on site at Mettam Safety Supply will be evaluated within 2-4 business days. Usually allow 2-4 weeks if unit(s) are evaluated by the manufacturer.

Customer will be responsible for forwarding the instrument with this form directly to Mettam Safety Supply or the manufacturer. Send unit and possible defective accessories only (such as chargers, Pumps, etc...). Only send calibration gas if it is suspected to have a problem.
